Cancer Outreach Golf Tournament

Every summer, the Mammoth Hospital Foundation hosts The Brian Venneman Memorial Cancer Outreach Golf Tournament at Sierra Star Golf Course. Thanks to the generous support of local businesses, sponsors, players, and volunteers the Tournament has been the main source of funding for the Cancer Outreach Program for several years.

However increasing demand for the program necessitates additional avenues of fundraising to support this important community resource. Which is where we look to contributions, big and small, from local groups, individuals, and grateful patients. See the back of this brochure for more information on how to donate.

Support the Cancer Outreach Program

If you are interested supporting the Cancer Outreach program, scan the code below or make a donation via check by making it out to “Mammoth Hospital” and sending to:

Attn: Talene Shabanian
Mammoth Hospital Foundation

The Cancer Outreach Program

Brian Venneman on the winning team in the 2010 Cancer Outreach Tournament

www.mammothhospital.com
The Cancer Outreach Program at Mammoth Hospital provides financial assistance to residents of Mono County who require cancer treatment outside the area. Although Mammoth Hospital does provide early detection screening and some treatment services such as chemotherapy infusion, high level cancer treatment is not available locally. Consequently, when a Mono County local is diagnosed with cancer, it means that individual and their family will be burdened with the expense of extensive travel, as well as illness.

In an effort to ease this burden and ensure that all patients can afford to seek the care they need, the Cancer Outreach Program offers financial assistance with expenses not covered by insurance. The program reimburses patients for the cost of gas, meals, and lodging incurred while traveling for cancer treatment.

In addition to financial assistance, Mammoth Hospital’s Cancer Outreach Program offers a cancer support group and resource referral.

**What Does The Cancer Outreach Program Do?**

Since the Cancer Outreach Program’s inception, we have helped support over 90 Mono County locals battling cancer!

“The support I have received from your generosity allowed me to recover from cancer with dignity! With financial thoughts at bay, my focus was on health and family!”

- Jill, Crowley Lake

The Cancer Outreach Program has made it possible for me to travel and go to all of my appointments. Without all of the support from the Cancer Outreach Program I honestly do not know what I would do, thank you!

- Allana, Mammoth Lakes

“We all have to travel for our cancer treatment. Traveling expenses add up quickly. It is both a financial and emotional relief to help with some of these unplanned expenses. For that help we are very grateful.”

- Jack, Mammoth Lakes

“I honestly do not know what we would do if not for the Cancer Outreach Program; maybe we’d have to sleep with our dogs in the car. I am a minister, literally as poor as a church mouse. From the bottom of my heart, I send every one of you my gratitude!”

- Pamela, Mammoth Lakes

To print an application for the Cancer Outreach Program visit www.MammothHospital.org and click on “Giving Back: Cancer Outreach Program” at the top of the page.

To learn about the available support groups, contact Lori Ciccarelli Stotko, MPS, Patient Experience Manager at (760) 924-4015. For more about the Cancer Outreach Program contact our Case Manager, Mona Logan, RN at (760) 924-4211.

**Making an Impact**

Mammoth Hospital’s Chemotherapy Infusion Services provides chemotherapy and care to cancer patients in all stages of illness and health. In order for a patient to receive chemotherapy here in Mammoth, they must have the support of their Oncologist. We provide I.V. chemotherapy infusions, coordination of care with the Oncologist, and any necessary supportive care. Or in cases where a patient is receiving chemotherapy in the Oncologist’s office located in another area, we can still be used as a resource and part of their support system.
